Education

G.H. Patel College of Engineering & Technology <i>B.Tech - Computer Science and Engineering (IoT)</i>	Anand, India Aug 2021 – May 2025
---	-------------------------------------

Experience

Nextbase Solutions <i>AI Automation Engineer</i> - Designed and deployed agentic AI systems for automated media generation, website building, and workflow orchestration. - Built scalable Python backends with asynchronous processing to manage long-running AI jobs and real-time task execution. - Implemented multi-model AI orchestration integrating LLM APIs, image-to-video pipelines, and structured prompt engines. - Developed API-driven automation for cloud storage, media processing, deployment pipelines, and social publishing integrations. - Architected modular workflow engines with reliability features including state tracking, validation loops, and automated error correction.	May 2025 – Present Surat, India
--	------------------------------------

Projects

Autonomous AI Video Automation System <i>Python, LLM APIs, REST APIs, AsyncIO, Cloud Storage</i> - Built a fully autonomous AI video platform for video cloning and script-to-video generation with intelligent workflow selection. - Implemented scalable media pipelines for prompt generation, segmentation, stitching, and structured execution planning. - Integrated cloud storage and social publishing APIs for end-to-end automated deployment.	Description
Agentic AI Media Platform <i>Python, AsyncIO, WebSockets, AWS S3, Vertex AI, Multi-Agent Systems</i> - Engineered a production-ready AI automation platform for image, video, caption, transcription, and document workflows. - Developed an asynchronous Python backend with real-time updates and multi-model AI orchestration. - Built scalable media processing pipelines with cloud-based asset management and state tracking.	Description
AutoGenix – Agentic AI Website Builder <i>LLM APIs, Next.js, GitHub API, Vercel, CI/CD, System Design</i> - Developed an agentic AI system that autonomously plans, builds, and deploys production-ready websites. - Designed a multi-agent pipeline for requirement analysis, UI generation, and phased code implementation. - Automated GitHub repository creation and Vercel deployment with integrated QA validation loops.	Description

Technical Skills

Languages: Python, SQL, JavaScript, C/C++
Backend & APIs: FastAPI, REST APIs, AsyncIO, WebSockets, GitHub API
AI & LLM Systems: OpenAI API, Gemini (Vertex AI), Whisper, LangChain, RAG Systems, Function Calling, Agentic Workflows, Prompt Engineering
Cloud & DevOps: AWS S3, Cloudflare R2, Vercel, Render, CI/CD
Media & Automation: Image-to-Video Pipelines, Workflow Orchestration, Multi-Agent Systems, Model Integration
Databases: PostgreSQL, MongoDB, Redis, Pinecone (Vector DB), Supermemory

Honors And Achievements

Introduction to Devops	View
Data Visualization with Python	View
Introduction To Structured Query Language(SQL)	View
C++ For C Programmers	View
